

9 Benefits of L-arginine:

1. Arginine provides one of the building blocks necessary for the body to maintain its own growth hormone levels which may help promote muscle mass, support muscle growth, and stimulate muscle development.*
2. Growth hormone has also been shown to help aid dietary efforts to decrease body fat.*
3. L-arginine helps produce nitric oxide (NO). NO is involved in helping maintain blood pressure levels that are already within the normal range.*
4. NO benefits the Cardiovascular System.*
5. NO helps promote sexual function.*
6. Research indicates that L-arginine may be beneficial in helping maintain healthy blood sugar levels that are already within the normal range.*
7. L-arginine may boost energy levels.*
8. L-arginine has been shown to have a positive impact on the immune system.*
9. L-arginine is an adaptogen.* Adaptogens help you adapt to changes in life, environment and may increase stamina and sports performance.

ProArgi-9

Low Glycemic
L-arginine
Formula*

* PATENTED

PROARGI-9 IS A REVOLUTIONARY NEW PRODUCT WITH A PROPRIETARY BLEND OF THE AMINO ACID L-ARGININE. FORMULATED BY WORLD RENOWNED ARGININE RESEARCHER, DR. ANN DE WEES ALLEN, SYNERGY HAS OBTAINED EXCLUSIVE RIGHTS TO MARKET HER PRODUCT.

Dr. Ann de Wees Allen is a Board Certified Doctor of Naturopathy. Dr. Allen has spent a large portion of her career as a researcher striving to develop the safest and most effective nutraceutical products as adjuncts to health, fitness, and longevity. Dr. Allen is a prominent scientist with expertise in the fields of L-arginine and growth hormone research, sports nutrition, glycemic index, thermogenesis, and orthomolecular and nutraceutical research and development. She is listed in Who's Who in Diabetes Education and Research, American Diabetes Association and is the patent holder of L-arginine delivery systems and leading edge low glycemic products.

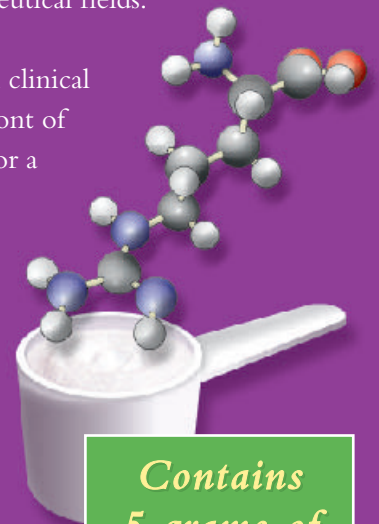

Dr. Allen has formulated ProArgi-9, a delicious drink mix with 5 grams of L-arginine in each serving.

The amino acid L-arginine is considered one of the most important Nutraceuticals ever developed, due to its powerful properties, and is referred to by scientists as the Miracle Molecule. The remarkable properties of L-arginine were validated by the 1998 Nobel Prize in Medicine, and since then have created a frenzy of interest in the Pharmaceutical and Nutraceutical fields.

Medical researchers have gathered enough clinical evidence to bring L-arginine to the forefront of modern science as an accepted modality for a variety of human health issues. The L-arginine phenomenon is changing standard methodologies in circulatory health, immune function, adiposity-generated concerns, blood pressure, sexual function, and human aging.

Columbia University refers to L-arginine as the "magic bullet" for the cardiovascular system. Over 10,000 L-arginine citations were compiled by Columbia University researchers in their quest to document the clinical benefits of this simple amino acid. It is now taught to medical students at Columbia University College of Physicians and Surgeons.

The Nobel Prize landmark discovery of the functions of Nitric Oxide (NO) elucidated the fact that without NO, human life would be impossible. Even more revolutionary was the irrefutable evidence that L-arginine is the body's chief source for creating Nitric Oxide.

**Contains
5 grams of
L-arginine
per Serving.**
